<u>Function</u>	<u>Backlog in Estimated Working Days</u>		
	<u>June</u>	<u>July</u>	<u>August</u>
Information Retrieval	120.0	110.0	100.0
Reference and Research	12.0	10.0	--

- 1/ Increase due to heavy increase of missions during reporting period with only a small increase in personnel.
- 2/ The marked difference between June and July is the result of a re-analysis of data and a refinement thereof.
- 3/ This increase resulted from increased inputs, and the fact that more personnel were on TDY in conjunction with intelligence processing projects, as no new personnel arrived during the period.
- 4/ The increase is due to the fact that the ALWAC IIIE Computer was down for an extended period, requests increased and no new people came on board.
- 5/ The increase is due to the fact that the ALWAC IIIE Computer was down for an extended period, requests increased and no new people came on board. In addition vacations and training accounted for a good part of the increase.
